

PROCLASSIC[®]

Premium Interior Enamels

*Unmatched performance
and lasting beauty.*

*Superior enamels in
alkyd or waterborne.*

PROCLASSIC advantages

- A hard, tough finish that takes abuse and is washable
- Provides excellent adhesion and resists blocking
- Gives a sprayed-on look even with a brush or roller
- Excellent flow, leveling and sag resistance

The benefits to you

PROCLASSIC is a top quality, premium enamel designed for professional use. PROCLASSIC Waterborne is available in Semi-Gloss and Gloss, while PROCLASSIC Alkyd comes in Semi-Gloss and our exclusive low-sheen Satin. Each has a buttery feel you can work and control with confidence. The result is a superior paint job that proudly showcases your craftsmanship on doors, trim, cabinets or walls.

PROCLASSIC[®]

Premium Waterborne and Alkyd Interior Enamels

PROCLASSIC Waterborne and Alkyd Interior Enamels

“PROCLASSIC is the best alkyd I’ve ever used! It has great gloss retention and an excellent final appearance when brushed that looks like it was sprayed.”

Roger Croad

*C & C Painting
Atlanta, Georgia*

“PROCLASSIC Waterborne really sprayed well. The product leveled out as good, if not better than, oil enamel. It covered, and most importantly, touched up well.”

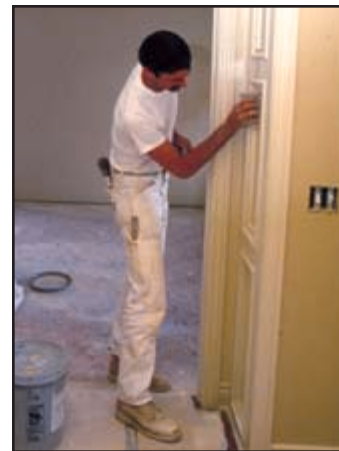

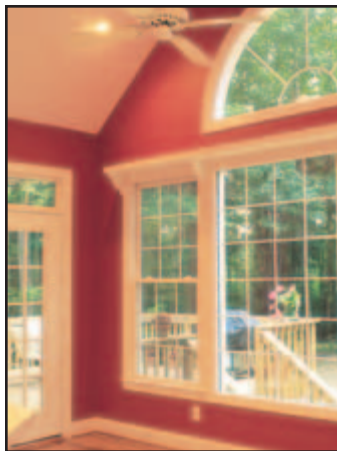

Ron Steinmetz

*Prime Painting
Holly, Michigan*

“With PROCLASSIC Waterborne, we can spray 16 doors and have them dry with a just-like-oil finish by the end of a single day. We get the look of oil in a lot less time.”

Greg Cramer

*Woman’s Touch Painting
Grand Island, Nebraska*

PROCLASSIC is the choice of professionals who want an enamel that provides maximum performance. You’ll satisfy customers with a durable, uniform finish that enhances a room’s appearance and is easy to maintain.

PROCLASSIC Waterborne Enamel *Alkyd performance in half the time*

ProClassic Waterborne Interior Acrylic Enamel combines the benefits of alkyd and waterborne. It has hardness, block resistance, adhesion, toughness and sandability along with low odor, fast dry time and it does not yellow. You get superior performance that cuts costs and eases application, and durability that keeps adding value into the future.

PROCLASSIC Alkyd Enamel *Two sheen choices*

Alkyd enamels can be too glossy, or too matte. But with PROCLASSIC Interior Alkyd, you can select a traditional semi-gloss or a low-sheen satin. PROCLASSIC Alkyd Satin offers a unique low-sheen appearance that minimizes surface imperfections while providing a smooth, hard enamel finish.

PROCLASSIC Enamels save time and money

- Easy to achieve a smooth, uniform finish
- Wet and dry hide lets you apply fewer coats

Toughness that passes the test of time

The hard, smooth PROCLASSIC finish stands up to high traffic and tough-use areas — giving lasting value that translates into referrals and repeat business for years to come.

Tough, buttery-smooth finish ideal for residential or commercial jobs:

- New residential construction or repainting
- Condominiums and apartments
- Hotels and restaurants
- Schools and universities
- Office complexes and retail businesses
- Government buildings
